

# Watershed High School

## Parent Compact, 2011-2012

**School's Role:** Our mission is to nurture the intellect, stimulate the will, and embrace the creative potential of youth in a balanced environment that engenders reverence, respect, and responsibility for nature and the needs of others.

Watershed High School values parents as their children's teachers and is committed to working with all our parents to ensure their students' success in school and life. Consistent with this value, we update parents about student progress through progress reports and parent conferences, regular informal communication from teachers and from our website and calls to parents when there is a concern. Watershed High School also holds parent events several times a year where staff members update parents on school events, policies and resources. Staff will also use this opportunity to ask for parent input on family and community involvement as well as school improvement.

**Students' Role:** Students are expected to understand and abide by school rules including behavior/safety policies. Students are expected to attend regularly, to actively work with school staff in planning a successful Individualized Learning Plan (ILP), and to do their best with their schoolwork.

**Parents' Role:** Parents are encouraged to support their student's regular attendance at Watershed High School and to help them with their education to the best of the parents' ability. Parents have to ask questions about their student's progress and to provide input on both their student's progress and Watershed's programs overall. Parents are provided with phone and email contact information for our staff. In addition to parent/teacher/student conferences, parents are encouraged to attend twice yearly Title I Parent and other family events at which parents are asked for their input on parent involvement and how the school can improve.
